Handlers of Corundum.

Boston. Dec. 16.—It is expected that Utah will declare a dividend today, and on a chance that it may pay \$2 the stock advanced to 434. The floating supply of Copper Range is small, and although the stock has been very quiet today, it advanced easily to 674. The buying of Winona is still good and the feeling here is bullish on the stock for a long pull. The market has not yet, however, fully recovered from the raids which have been made lately. For the next week or tendays we think that stocks sold on the railies can be bought back cheaper. Quotations:

Fred and G. L. Bemis have begun work with a small force on the Iron mountain group of claims, in Barney's canyon, recently located. Their locations extend 6,000 feet along a vein 150 feet wide, identical in character and believed to be a continuation of the main ledge of the Highland Boy. At outcrop the ore assays 5 to 35 per cent iron, and 50 cents to \$5 in gold, and silver. The vein is a lime contact with porphyry intrustions. A good boarding and bunk house is completed, supplies have been put in and it is the intention to continue development work throughout the winter.

General Confidence in Heavy Demand

New York, Dec. 16.—Dun's Weekly Review of Trade tomorrow will say:

Manufacturing activity steadily increases, testifying to the general confidence in a heavy demand next year, and trading branches of business report seasof merchandise are going into larger consumption, while it is the exception when there is complaint regarding mercantile collections. The proportion of idle machinery is growing smaller, and the number of unemployed less, few labor disputes of significant dimensions existing outside of Full River. Farm staples are returning large profits to producers, and foreign trade returns for November showed a very small loss in exports, considering the abnormal figures last year. For the last week at this port imports were \$2.571.38 larger than in 1903, but exports declined \$2.62,800.

Far from meeting with the setback that many traders anticipated, the iron and steel industry has gone steadily forward. Packers' hides are steady, but weakness has developed in country hides, and buyers of native steers wait for concessions. Foreign dry hides are firmly held.

F—ires for the week numbered 276 in the United States, against 329 last year, and 25 in Canada, compared with 20 a year ago.
